

## TECHNICALLY ENHANCED WOOD VENEER DATA SHEET

RealTec® Technically Enhanced Wood Veneer is manufactured using a unique, proprietary process that physically alters standard, readily available, quarter-cut wood veneer. Consistent, from sheet to sheet, RealTec offers the largest number of figured, sequenced sheet wood veneer in the industry. The "fiddle-back" figure cannot be sanded out, nor will staining or dyeing affect the distinctive appearance. RealTec is available in both SanFoot and SanPly products.

SanFoot RealTec Veneer offers the following great benefits:

- Class A Fire Rated, ASTM 84
- All faces are Quarter Cut Architectural Grade Real Wood Veneer.
- All sheets are sequenced matched from the same flitch.
- All RealTec species are available in SanFoot and TransTec backers.
- SanFoot RealTec are available in 3' x 9' and 3' x 10' standard size, other sizes may be available upon request.
- Maximum radius ability in the industry; ¼" end grain bend and 90 degrees side grain.
- Consistent figure pattern from sheet to sheet.
- Largest sequencing number of sheets in the industry.
